University Class Enrollment System

Version	1.1
Author	Britney Senaratne
Role	Business Process Associate
Date	May 09, 2026

1. Executive Summary

The Online Class Enrollment System is designed to provide a structured and automated course registration process for students and academic advisors. The system ensures that enrollment adheres to university policies regarding prerequisites, credit limits, and course capacity through real time validation.

2. Business Scenario

University enrollment involves multiple stakeholders requiring a self service portal for students and monitoring tools for advisors. The system must maintain high data integrity across a centralized database to ensure academic standards are met.

3. Functional Requirements

ID	Requirement Description	Priority
FR-01	User Categorization: The system shall differentiate between Undergraduate and Postgraduate students through a common generalization profile.	High
FR-02	Prerequisite Validation: The system shall automatically include a prerequisite check (Eligibility Check) for every course registration attempt.	Critical
FR-03	Course Search & Navigation: Students shall be able to search for available courses based	High

	on catalog availability.	
FR-04	Registration Actions: Students must be able to Register, Drop, or Swap courses in their current schedule.	Critical
FR-05	Waitlist & Extension: If a course reaches full capacity, the system shall extend the registration flow to offer a waitlist option.	Medium
FR-06	Advisor Approval Workflow: Advisors must verify credit eligibility before approving elective requests.	High
FR-07	GPA Threshold Intervention: If a student GPA is below the threshold, the system triggers a mandatory meeting request to the advisor.	High
FR-08	Enrollment Confirmation: Students shall be able to download a PDF confirmation of their final enrollment schedule.	Low

4. Stakeholder Roles (Actors)

- **Undergraduate & Postgraduate Students:** Primary users who search, register, and manage course schedules.
- **Academic Advisor:** Monitors student progress, approves/rejects elective requests, and manages credit limits.
- **Enrollment Database:** The central system of record for real-time course availability and registration status.

5. Business Rules

- Generalization: Undergraduate and Postgraduate students share common core registration features.
- Condition Based Flow: Registration is only completed if Prerequisites = MET.
- GPA Intervention: Automatic meeting trigger for students below academic thresholds.
